EXPERIENCE | NETWORK ADMINISTRATOR PLATINUM DUNES

APRIL 2008 - PRESENT

Responsible for the policy, execution, security, and maintenance of client application and web servers. Interaction on a daily basis with clients, network security engineers, project managers, and upper-level executives.

- Setting up and maintaining servers, databases, networks, firewalls, IDS/IPS, and ensuring those services are set up in agreement with best practices and legal/auditing policies
- Monitoring client networks for unauthorized access and malicious activities via SIEMs
- Mitigating intrusions and network attacks (DDoS) on client's servers
- Assisting with incident response in the capacity of containment and eradication of network intrusions and the propagation of ransomware on networks and hosts
- Teaching individuals who have little or no experience in the concepts of maintaining a secure online presence and training new hires on basic network security concepts

SENIOR INTERACTIVE DESIGNER STAPLES INC

SEPTEMBER 2001 – MARCH 2008

Designed and maintained Staples day-to-day online events. Created solutions that provided a consistent and friendly shopping experience while allowing for each web page's visuals, iconography, and copy needs.

- Created email and web templates to be used across all business platforms
- Worked with other designers to oversee integrity of the email and web templates
- Oversaw the re-branding of existing online designs including web site, collateral, email promotions, etc.
